# What is the Observability TAG?

KubeCon

CloudNativeCon

North America 2023

- Foster, review, and grow the ecosystem of open source observability
- Identify and report gaps in the CNCF's observability project portfolio
- Share patterns and current good practices
- Educate and inform users without bias
- Vendor-neutral venue for relevant thought validation, discussion, and project feedback
- Support the TOC for process improvements and project due diligence for sandbox, incubation, and graduation stages

## Measuring Project Health

- Health metrics
  - i. Contributor growth
  - ii. Maintainer diversity
  - iii. Project velocity
  - iv. User adoption
- Are core technologies at risk? Jaeger, Cortex
- Gaps in CNCF project landscape - missing core observability functionality such as tracing store, logging store, UI/visualization, cost tracking, standardized querying

# TAG Work in Progress

KubeCon

CloudNativeCon

North America 2023

- Query Language Standardization workgroup
- Observe-K8s workgroup
- Collaboration with other TAGs - AI workgroup with TAG Runtime, Landscape graph with TAG Security
- Observability Whitepaper [draft](#) now available for review
  - Focus Areas for this whitepaper include
    - Are your development, pre-prod and prod environments observable
    - What data signals do you find most useful in these environments
    - Are you using metrics, logging, profiling, tracing, real-time events, exceptions

# WG - Observe k8s update

KubeCon

CloudNativeCon

North America 2023

- Highlights and Accomplishments
  - Observability Demo:  
<https://github.com/observe-k8s/Observe-k8s-demo>
    - [GCP GKE Deployment Steps](#)
    - [AWS EKS Deployment Steps](#)
- CNCF Slack channel: #wg-observe-k8s
- Workgroup meets every two weeks
- Help wanted
  - Present documented use cases for observability on a GitHub pages website

# WG - Query Standardization Kickoff!

KubeCon

CloudNativeCon

North America 2023

- Highlights and Accomplishments
  - DSL Designer Survey results from [Google Monarch](#), [Microsoft KQL-M](#), [Opensearch PPL](#), [Prometheus PromQL](#) and [KX Q](#)
  - Presentations from Microsoft, AWS, KX Systems
  - Discussions with the SQL standards working group
- CNCF Slack channel: #obs-query-standard-wg
- Workgroup meets twice a month on 2nd and 4th Tuesdays
- Hoping to wrap up data collection by Q2 2024 then start spec discussions
- Help Wanted:
  - Need help documenting use cases and query language semantics

# Future

# Observability Trends

KubeCon

CloudNativeCon

North America 2023

- Profiling - Cilium graduating, profiling/eBPF continuing to gain adoption
- Data Collection
  - OpenTelemetry has added profiling, semantic conventions, Elastic Common Schema convergence into OTLP for logging
- Cost Optimization
  - Telemetry data instrumentation in cloud-native infrastructure (K8s, Databases, Storage, Networking) for real-time analysis
  - Data Management
- AI observability
  - More data and more models
- O11y UIs
  - Standardization
  - Alerts and Dashboards as Code
