

Title

Agenda Notes: 35 mins

Deadline to submit slides- Oct 14

- Few slides and talking for 8 mins background (Introduction) Evan
 - Life of a serving request
 - Life of an event
 - Life of a functions
- show how all pieces of knative comes together (so that people can ask more questions) - Lance 5-8 mins
- Discussion 15 mins for broader discussion
- Prepared questions to be asked(not part of slides) Salaboy and Naina (<u>Link to doc</u>)

BUILDING FOR THE ROAD AHEAD

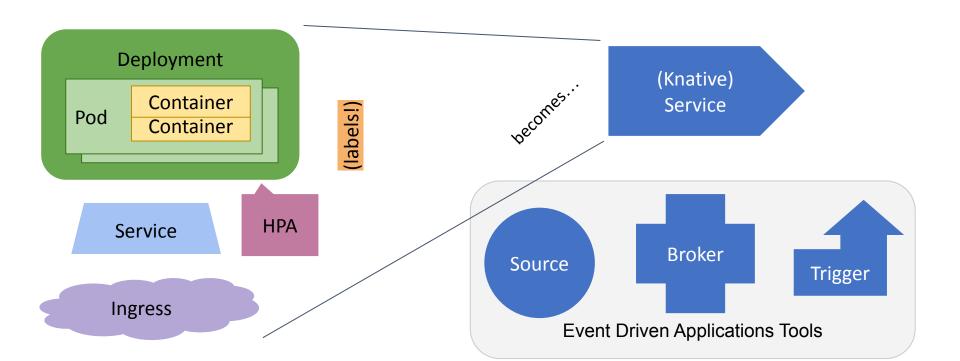

DETROIT 2022

Why is Knative?

Knative: Serverless Tools for Kubernetes

Simplify application development and deployment, reduce developer toil and cognitive overhead.

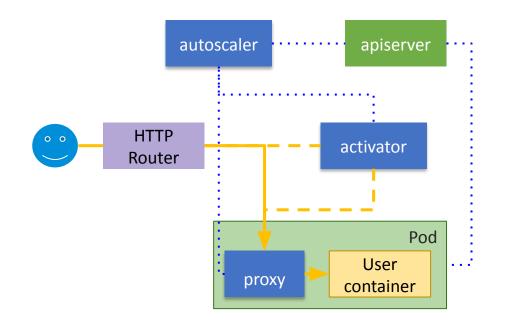

Serving: Under the Hood

Automatic HTTP Services

If you have a container that speaks HTTP:

Scale based on requests in flight
Roll out by traffic percentage
Automatic revision tracking
Automatic health checks
Automatic TLS provisioning
Automatic HTTP(S) URL provisioning

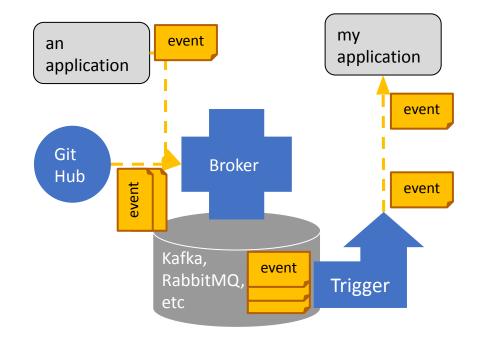

Eventing: Under the Hood

Declarative, Event-Driven Applications

CloudEvents-over-POST (HTTP):

Declarative Kubernetes resources
Manage application events
Collect events from infrastructure
Route events by attribute
Manage retries and dead-letter
Pluggable event storage
(Kafka, RabbitMQ, NATS, memory)

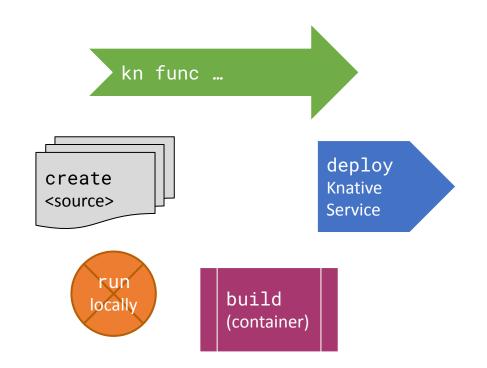

Functions: Under the Hood

Simplifying Code → **Container**

In the language of your choice:

Quick get-started template
Avoid wrangling HTTP libraries
Handle POST requests
Handle CloudEvents
Build standard container images
Build without Docker

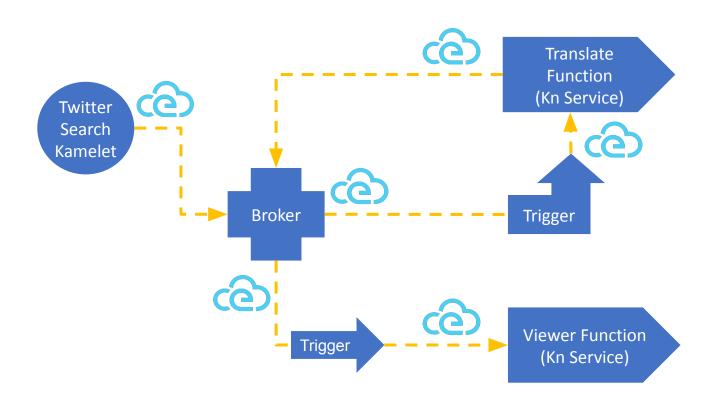

Bringing it together with a demo

Twitter Bot Event Flow

Panel Discussion

Red Hat

How to get involved, ask questions or lurk 😉

- Slack community to ask questions and provide feedback https://slack.knative.dev/
- Google group to get insiders scoop. https://groups.google.com/g/knative-dev
- See what is happening and when on Knative Community Calendar
- See who is using or providing solution using Knative at **Knative Adopters**
